Besides required features...

- As a team of 5, we still implemented update feature for business info, service, service combo, and appointment in iteration 2 and 3
- We have almost all test cases passed
- As a team of 5, we additionally implemented update service in UI in iteration 4

PART 2

Application structure

UI Summary

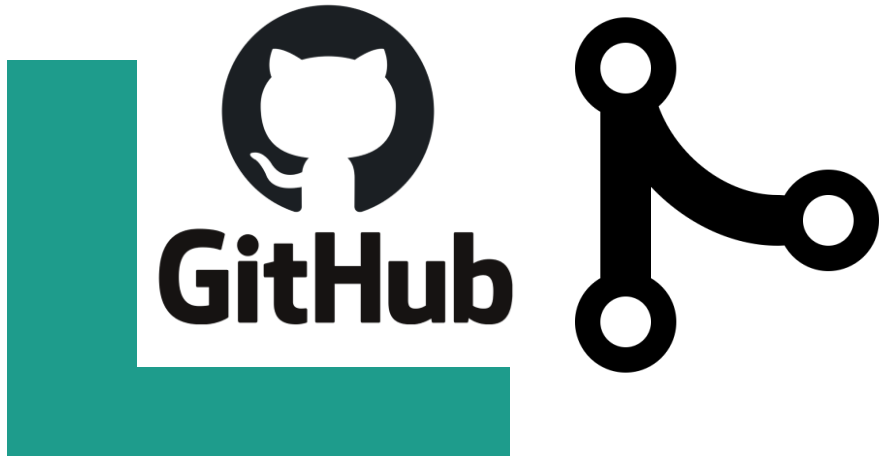

PART 3

Lessons learned

What have we learned from the project?

Dealing with Github Merge Conflict

- It was a chaos when we first had this issue in iteration 2
- Learned and improved in later iterations

Communication within team

- Bring up issues instead of hiding
- Communicate effectively and resolve the problem as team
- Problem that costs you one hour to address may be solved by another member in seconds

END

THANK YOU
